Professional Experience

CPM – Coconut Creek, FL (Hybrid)

(11 Months)

Senior Implementation Specialist

April 2025 to Present

Role Outline:

- Led the implementation and optimization of 8+ technology initiatives across operations, finance, and field services, improving system efficiency and cross-department collaboration.
- Evaluated and piloted 5+ enterprise platforms (ERP, field service management, and analytics tools) to modernize operational workflows for a 400+ user field workforce across multiple company branches.
- Designed and deployed Power BI operational dashboards tracking crew productivity, safety scores, vehicle performance, and job profitability, enabling leadership to monitor 20+ operational KPIs in real time.

- Built automated workflows integrating FastField, SharePoint, HubSpot, and financial systems, reducing manual data entry and improving estimate-to-invoice processing efficiency.
- Implemented automation and data pipelines that consolidate operational data from multiple systems into centralized reporting models, improving decision-making for branch managers and executives.
- Partnered with operations leadership to translate field service requirements into technology solutions that support hundreds of daily work orders and service operations across multiple locations.
- Standardized internal technology processes and system architecture to improve data accuracy, reporting consistency, and cross-team visibility across departments.
- Facilitated cross-functional meetings with operations, finance, and leadership teams to manage project timelines, mitigate risks, and ensure successful technology adoption.
